

Bridge Replacement and Highway Alignment Study Surveyors will be in the Village from November 28th to December 5th.

Alberta Transportation's consultants, Hatch, have advised the Summer Village that they will have surveyors in Waiparous working on and around Forestry Trail over the next two weeks undertaking survey work in order to develop and evaluate two alignments:

1. the recommended alignment in the Hwy 40 Functional Planning Study (B-4)
2. the existing Highway 40 bridge alignment.

To support the study of each of these two alignments, it is necessary for the consultants to carry out an extensive topographic ground survey. The areas shaded on the following map are the locations of the survey work. *Please note: The width of the shaded area has been established to set the limits for data gathering only and is greater than the width of a potential road alignment.*

Residents with property inside the shaded routes have already been contacted by the consultants to request access to their property. *Note: The surveyors WILL NOT be entering any private lands where they have not obtained prior access permission from the landowner.*

If you have any questions, please contact the Village Office and we will direct your questions to the appropriate individual(s).
